

New Pricing - New Units only \$250!

Last Updated Wednesday, 25 July 2012

We've just announced a fantastic range of competitive pricing plans for our carshare and pooled fleet product.

Our telematic units, the core component of our carshare solution, have drastically reduced in price (we purchased thousands of them, and are passing the savings onto you).

You might also want to know that we also updated the functionality of our units to add GPS and improved GPRS connectivity.

We think we've got the best, most affordable carshare technology solution on the planet - what do you think?

Check out our [new pricing here](#) .
